

Pete Knows Building & Buildings

Both in the Field, and on the Stand

Pete's construction career began with digging ditches over 40 years ago, and since then has included almost every role in the industry. Pete Fowler Construction, founded in 1995, has become a national team of building experts and project management professionals who help clients make smart, informed decisions about their buildings, on 1,000 unique projects every year. Pete has vast experience with building, buildings, claims, and litigation. His expert witness testimony experience includes more than 100 depositions, arbitrations, hearings, and trials, including federal court.

"Let's Build a Real Construction Consulting Business"

Pete is passionate about helping people make smart decisions. He founded this company committed to creating a business that prioritized ethical practices equal to the quality of the work. This dual focus has earned the trust of thousands of clients who have relied on the company's expertise to face tough situations, solve challenging building problems, and navigate the complexities of building, buildings, claims and litigation.

Thought Leadership

Pete is an accomplished author, presenter, and teacher. He has published articles in national magazines, including the first national publication on construction defects and one of the earliest on mold management. Pete has been invited to speak by the most important groups in the building industry, and has composed and delivered hundreds of educational programs. Pete's academic background includes a Bachelor of Science in Construction Management, a minor in Information Systems, and functionally innumerable continuing education activities including a Blackbelt in Lean Six Sigma. Education and practical experience has allowed Pete to design a world-class proprietary technology system for Pete Fowler Construction and foster a company culture focused on people-centric continuous improvement.
