

Greg Knows Buildings

Bringing Clarity to Complex Code and Construction Challenges

Greg Burke is a seasoned construction consultant and licensed architect with more than 40 years of experience in architecture, design, and construction. His expertise spans construction defects and property claims, with a strong focus on building code compliance, ADA requirements, project evaluation, and standard of care. Greg's depth of experience allows him to assess complex building issues with a practical, solutions-driven approach, whether addressing design deficiencies, code-related challenges, or performance concerns across a wide range of building types.

Experienced, Practical, and Detail-Oriented

Greg applies a comprehensive understanding of construction documents, building systems, and regulatory requirements to evaluate projects and identify deficiencies. His experience includes construction administration, code analysis, and the development of clear, actionable repair recommendations. He is skilled in navigating complex compliance and permitting challenges, ensuring that projects align with applicable codes and standards while supporting efficient resolution.

Leadership Backed by Decades of Experience

In addition to his consulting work, Greg has served as President and Principal Architect of his own firm since 1998 and has held key project leadership roles with nationally recognized firms. His experience spans all phases of design and construction, from feasibility studies and site selection through project execution. Greg collaborates closely with owners, contractors, design professionals, and legal teams to provide thorough evaluations and practical solutions, making him a trusted resource in resolving complex construction challenges.
