EXPERIENCE

Technical Consultant | Pete Fowler Construction Services, Inc. *2024 – Present*

In his role as a technical consultant at Pete Fowler Construction, Dante plays a key role in evaluating and testing the physical performance of buildings. He analyzes extensive project documentation, recommends repairs, estimates project costs, oversees the bidding process, and provides professional insights that support the timely completion of projects.

Estimator & Reconstruction Manager | Servpro *2022 - 2024*

Managed the estimation, sales, and oversight of damage repairs for both residential and commercial properties. Developed and maintained an individual book of business while handling payment collections. Oversaw projects from start to finish, ensuring timely completion and seamless execution. Led superintendents and field staff to ensure projects were completed efficiently and met the highest standards.

Branch Manager| Emercon Construction, Inc. *2019 - 2021*

Led training for estimators and superintendents, and contributed to the development of advanced budgeting techniques to monitor project costs. Assisted in creating a purchase order system to ensure strict purchasing control and increased supervisor accountability to improve in-house crew efficiency. Managed office facilities and staff while working closely with the Vice President to implement uniform procedures, enhancing cohesion across outside branches.

Estimating & Sales| Emercon Construction, Inc. *2015 - 2021*

Estimated, sold, and managed damage repairs for both residential and commercial properties, while developing and maintaining a personal client portfolio. Handled payment collections and managed projects from start to finish, ensuring successful completion.

Superintendent| Emercon Construction, Inc. *2014 - 2015*

Trained across all divisions of the company to enhance industry knowledge, including contents, emergency services, painting / drywall, and superintending. Gained expertise in various trades by working closely with subcontractors to develop a comprehensive understanding of each trade's specific requirements.
